FinTech & Trading	MetaTrader 5 (MT5), Technical Analysis, Risk Management, Algorithmic Trading

WORK EXPERIENCE

Software/Web Developer | NITDA - Abuja / Remote | 05/2025 – Present

- Developed and maintained scalable Next.js applications, improving overall load performance and responsiveness.
- Implemented interactive web features that enhanced workflow efficiency and user engagement.
- Collaborated with cross-functional teams to debug systems and deploy enterprise-level features.

Financial Markets Specialist (Day Trader) | Baron DFX | 2022 – Present

- Developed and executed technical trading strategies focused on GBP/JPY scalping and risk management.
- Built educational trading materials and technical documentation for forex and cryptocurrency markets.
- Applied market analysis and automation concepts to improve trade execution accuracy.

Junior Web Developer | Mewar University | 11/2024 – 03/2025

- Built responsive websites using React and WordPress with secure payment integrations.
- Collaborated on internal development tools that improved productivity and workflow management.
- Supported UI improvements and frontend optimization across multiple projects.

KEY PROJECTS

Algorithmic Trading Bot (Python/MT5)

- Built a Python-powered MetaTrader 5 trading bot capable of analyzing live market conditions and automating trade execution with custom GBP/JPY scalping logic.

Financial UI/UX Portfolio

- Designed a collection of high-fidelity finance and trading application templates focused on modern UI/UX systems and mobile responsiveness.

Aron Trader (Full-Stack)

- Engineered a full-stack market analytics platform using React and Node.js for tracking, analyzing, and visualizing trading data.

EDUCATION

B.Sc. Computer Science (Software Engineering)

Mewar University, Nasarawa | 2022 – 2025
